Illy machines

## X 2.1 ipso professional machine

X 2.1 Ipso professional machine

## Y1 iperespresso

The Y1 is an espresso machine quite unlike any other: elegantly smooth, spare yet substantial, with a diminutive 9.5-inch square base fashioned from tempered glass and brushed aluminum. Once again, illy charts a new path. That sleek beauty and compact footprint belies illy's revolutionary Iperespresso capsule system, producing a delightfully aromatic, full-bodied yet remarkably smooth espresso, with velvety crema, at one touch of a button. Simply place an Iperespresso capsule inside the Y1's mini tower, press start, and enjoy authentic, flawless espresso in just seconds. Capsules load quickly and eject automatically.

Y1 iperespresso machine

## X 7.1 iperespresso

The successful X7 has pushed illy to design the next generation: X7.1 has the same winning features of the previous model, but is now even more effective, fast and simple to use. The handy, illy patented pannarello\* milk frother for making soft, velvety foam, rapid switching from cappuccino to coffee mode and the automatic shut off are this machine's most functional features. The coffee, protected by the capsule, is always top quality and never comes into contact with the machine, meaning minimal cleaning and maintenance. In search of the perfection of bar quality espresso in the convenience of your own home.
