

Water

Acqua Panna . San Pellegrino

Acqua Panna

Acqua Panna natural mineral water flows from a source within a natural reserve on the slopes of Monte Gazzaro in the Tuscany Apennines, after a 15 years journey through rocks. The land surrounds the source is an untouched reserve of 1.300 hectares. Acqua Panna takes care of nature and environment, of its flora and fauna. It's the only one water that enhances the match with food and wines

San Pellegrino

S.Pellegrino is a premium quality mineral natural water with significant taste personality, a rich mineral structure, a dense perlage of reasonably fine bubbles in abundance and a moderate acidity. S.Pellegrino best expresses itself contrasting intense sensations or cleaning the palate of residue sensations that might inhibit the pleasure of the ensuing course.
